

inSight

From wound documentation to wound intelligence.

eKare inSight® turns consistent wound documentation into intelligence. It helps teams understand healing, outcomes and variation so that they can proactively act on what the data tells them.

ONE PLATFORM. THREE THINGS THAT MATTER.

Document. Track. Act on what matters.

01

Document

Create objective, structured wound data.

Capture consistent, objective wound information with AI-powered imaging, measurement and structured assessment.

02

Track

Understand healing, outcomes and variation.

Understand healing, outcomes and variation over time across patients, clinicians, teams and services.

03

Act

Turn insight into better decisions and service improvement.

Use intelligence to identify deterioration, variation and what is or is not working then target improvement.

Why it matters

- **Standardise wound information**
  Consistent, objective data across clinicians and settings.
- **Understand healing sooner**
  Make progress, deterioration and non-healing visible.
- **Use resources better**
  Reduce admin and focus specialist input where it adds value.
- **Prove and improve outcomes**
  Use outcomes and variation to target improvement.

REAL-WORLD IMPACT

Proven at scale NHS South Warwickshire (2025)

275
Nurses using eKare daily

16,604
Wounds healed

24 → 11 54% faster
Weeks average healing time

11,780+
Hours of admin time saved

TESTIMONIAL

"eKare's inSight™ app has revolutionised wound care for our team here at SWFT. We have been able to successfully prove our outcomes and identify additional benefits that we were not expecting."

– Tissue Viability Strategic Lead for Out of Hospital, South Warwickshire University NHS Foundation Trust

Value at every level

FOR CLINICIANS

Less admin
Faster, structured documentation at the point of care.

See the whole healing story
Objective measurement and a clear longitudinal wound record.

Act sooner
Make deterioration or stalled healing easier to recognise and escalate.

FOR SPECIALISTS

Evidence your service
Robust data to evidence and justify your service.

Reflect and improve
Use data and reflection to identify what to stop, start or improve.

Demonstrate value
Evidence outcomes, value for money and the value your team adds for patients and staff.

FOR PATIENTS

See progress
Make healing visible so patients can see how their wound is changing over time.

Stay engaged
Visible progress can support motivation to follow the agreed treatment plan.

Understand their care
A clearer picture of healing supports better conversations with the clinical team.

FOR ORGANISATIONS

Understand outcomes and variation
See healing, activity and variation at service level.

Use resources more effectively
Use intelligence to focus clinical time and specialist input where it is needed.

Turn data into improvement
Support reporting, pathway redesign and measurable service transformation.

Make every wound visible.
Make every decision better informed.

Move beyond recording activity.
Understand healing, outcomes and variation and act on what the data tells you.
